

Nikhilesh Vijay Chirutala

Full-Stack Software Engineer

+91-9618873598 • nikhilesh.chirutala@gmail.com • [Linkedin](#) • [Github](#) • [Portfolio](#) • Bengaluru, IN

SUMMARY

Full-Stack Software Engineer with 2.8+ years of experience building and maintaining production applications across AI, CRM, trading, and cloud contact center platforms. Strong experience with Python, Django, Django REST Framework (DRF), FastAPI, Angular, JavaScript, TypeScript, REST APIs, JSON, PostgreSQL, MongoDB, AWS, and cloud application development. Experienced in backend and frontend development, Web APIs, authentication, RBAC/ACL authorization, database-driven workflows, testing, debugging, and production troubleshooting. Hands-on experience implementing RAG-based chatbot solutions and LLM integrations for contextual information retrieval.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: Angular, React.js, Next.js, Bootstrap, Tailwind CSS, Jinja2, UI/UX interactions

Backend: Django, Django REST Framework (DRF), FastAPI, REST APIs, Web APIs, JSON, API Development, Backend Automation, Authentication, RBAC, ACL

Databases: PostgreSQL, MySQL, MongoDB, Neon DB, SQL

AI & LLM: RAG, LLM Integration, Vector Search, Prompt Engineering

Cloud & DevOps: AWS, Amazon S3, Vercel, GitHub Actions, CI/CD, Linux

APIs & Integrations: Twilio, GitHub API, REST APIs, Postman

Testing & Tools: Postman, Jest, Unit Testing, Git, GitHub, Visual Studio Code

WORK EXPERIENCE

Software Engineer • CA One Tech Cloud Inc.

Apr 2026 – Present | Bengaluru, India

- Develop backend services and automation for a cloud contact center platform, supporting application workflows, data processing, REST APIs, and cloud-based operations.
- Design and maintain Python and FastAPI services and APIs, translating business requirements into backend functionality, JSON-based integrations, and application workflows.
- Develop AWS-based solutions for application data and storage workflows, with a focus on reliability, validation, error handling, and operational consistency.
- Investigate production issues, perform root-cause analysis, implement bug fixes and feature enhancements, and validate changes before release.

Key Projects:

CONVOSO — Cloud Contact Center Platform

Python, FastAPI, AWS, Amazon S3, REST APIs

- Developed backend services supporting lead routing, call recording management, data processing, REST APIs, and cloud storage workflows.
- Designed recording-recovery workflows processing 10,000+ recordings per month and restoring missing or inconsistent recording data.
- Implemented S3 storage validation and metadata synchronization to maintain consistency between application records and cloud objects.
- Built automation to identify, recover, organize, and synchronize recordings across storage systems, reducing manual intervention.
- Added validation, JSON processing, and error handling for failed recording operations and unexpected storage states to improve recovery reliability.
- Traced application failures across backend services, cloud storage, and metadata workflows to identify root causes and implement fixes.

Software Engineer • Mantra Technologies

Feb 2024 – Mar 2026 | Hyderabad, India

- Worked across four production applications, delivering backend, frontend, REST API integration, and full-stack application features.
- Built backend modules, REST APIs, and business logic using Python, FastAPI, and database technologies for application-specific workflows.
- Developed frontend interfaces using Angular, React.js, Next.js, JavaScript, and TypeScript, integrating UI workflows with backend APIs.
- Implemented authentication, RBAC, and ACL-based authorization to enforce access controls across application resources.
- Integrated third-party services including Twilio and GitHub API and supported application deployments across AWS and Vercel.
- Maintained GitHub Actions CI/CD workflows and handled API testing, debugging, bug fixes, and production support using Git and Postman.

Key Projects:

AI Bull — AI-Powered Trading Platform

React.js, Next.js, FastAPI, Python, MongoDB, RAG, LLM

- Developed an AI-powered trading and investment analysis platform for stock and mutual fund analysis, screening, and back-testing.
- Implemented a Retrieval-Augmented Generation (RAG) based chatbot that retrieves relevant financial and application-specific information to generate contextual responses.
- Integrated the RAG chatbot into application workflows, enabling conversational access to relevant financial information.
- Built FastAPI/Python backend APIs and business logic for financial data processing and application workflows.

- Developed back-testing engines and configurable screening and filtering capabilities for stocks and mutual funds.

CRM.io — AI-Driven CRM System

FastAPI, Python, Jinja2, MongoDB, ACL, Twilio, REST APIs

- Developed CRM modules for Contacts, Tasks, communication workflows, and telephony operations using FastAPI and Python.
- Implemented RBAC and ACL authorization to control access to CRM resources based on user permissions.
- Integrated Twilio for telephony and communication functionality and developed server-rendered interfaces using Jinja2.
- Tested APIs and workflows with Postman and resolved bugs across CRM functionality and production workflows.

GharPe — Real Estate Management Platform

React.js, FastAPI, Python, MongoDB, REST APIs

- Developed the React.js-based admin system for managing real estate projects and controlling their visibility and availability on the website.
- Built project management workflows allowing administrators to create, update, configure, and manage projects displayed across the platform.
- Developed lead management functionality to track and manage customer inquiries generated through the platform.
- Built builder management features for maintaining builder information and associating builders with their respective projects.
- Developed and integrated FastAPI/Python REST APIs supporting administrative workflows, project configuration, and data operations.

PERSONAL PROJECTS

TaskFlow — Full-Stack Task Management Platform

Django, Django REST Framework (DRF), Angular, TypeScript, PostgreSQL, REST APIs, JSON, Bootstrap

- Developed a full-stack task management platform using Django and Django REST Framework (DRF) for backend services and Angular with TypeScript for the frontend.
- Built RESTful Web APIs with DRF for task, project, and user management, including JSON request/response handling, validation, and CRUD operations.
- Developed reusable Angular components and services to consume backend APIs and implemented responsive UI interactions using Bootstrap.
- Integrated PostgreSQL for persistent application data and implemented authentication, authorization, error handling, and API testing workflows.

JS Studio — Online JavaScript Playground

Next.js, GitHub API, Vercel

- Developed an online JavaScript playground for writing and executing JavaScript through a web interface.
- Integrated GitHub APIs and deployed the application with Next.js and Vercel.

AnyScrum — Project Management Platform

Next.js, Neon DB, Clerk, Vercel

- Developed a project management platform for projects, tasks, and team workflows.
- Implemented authentication and user management with Clerk and persistent application data with Neon DB.

Guider — Angular Learning Portal

Angular 19, TypeScript, HTML5, CSS3, SSR, Vercel

- Built an interactive learning platform using Angular 19 and TypeScript with reusable frontend components and server-side rendering.
- Developed responsive UI workflows using HTML5, CSS3, and component-based Angular architecture and deployed the application on Vercel.

Contact Management App — Contacts Storage Application

React.js, JavaScript, Netlify

- Developed a React-based application for creating, viewing, updating, and managing contact information.
- Built reusable UI components and deployed the application on Netlify.

EDUCATION

B.Tech — Electrical & Electronics Engineering

2019 – 2023 | GPA: 7.73 / 10

Srinivasa Ramanujan Institute of Technology, Anantapur
