

Nikhilesh Vijay Chirutala

Software Engineer - Application Development

+91-9618873598 • nikhilesh.chirutala@gmail.com • [Linkedin](#) • [Github](#) • [Portfolio](#) • Bengaluru, IN

SUMMARY

Software Engineer with 2.8+ years of experience developing and maintaining production applications across cloud contact center, AI, CRM, trading, and business application platforms. Strong experience with Python, FastAPI, AWS, REST APIs, MongoDB, application development, and cloud-based solutions. Experienced in translating business requirements into backend functionality, diagnosing production issues through root-cause analysis, evaluating solution alternatives, testing implementations, and supporting reliable deployments. Hands-on experience with AWS-based automation, application integrations, authentication, access control, and RAG-based chatbot development. Strong problem-solving and logical thinking skills with experience improving existing processes and delivering production-ready solutions.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Backend & Application Development: Python, FastAPI, Node.js, Express.js, REST APIs, API Development, Backend Automation, Django

Cloud & DevOps: AWS, Amazon S3, AWS DevOps, Vercel, GitHub Actions, CI/CD, Linux

Databases: MongoDB, Neon DB, SQL

Frontend: React.js, Next.js, Angular, Tailwind CSS, Bootstrap, Jinja2

AI & LLM: RAG, LLM Integration, Vector Search, Prompt Engineering

APIs & Integrations: REST APIs, Twilio, GitHub API, Postman

Testing & Tools: Postman, Jest, Unit Testing, Git, GitHub

WORK EXPERIENCE

Software Engineer • CA One Tech Cloud Inc.

Apr 2026 – Present | Bengaluru, India

- Develop and maintain backend services and automation for a cloud contact center platform, supporting application workflows, data processing, and cloud-based operations.
- Design and maintain Python and FastAPI services and REST APIs, translating business requirements into backend functionality and application integrations.
- Develop AWS-based solutions for application data and storage workflows, applying validation and automation to improve reliability and operational consistency.
- Diagnose production issues, perform root-cause analysis, evaluate solution alternatives, implement bug fixes and enhancements, and validate changes before deployment.

Key Projects:

CONVOSO — Cloud Contact Center Platform

Python, FastAPI, AWS, Amazon S3, REST APIs

- Developed backend services supporting lead routing, call recording management, data processing, and cloud storage workflows.
- Designed recording-recovery workflows processing 10,000+ recordings per month and restoring missing or inconsistent recording data.
- Implemented AWS S3 storage validation and metadata synchronization to maintain consistency between application records and cloud objects.
- Built automation to identify, recover, organize, and synchronize recordings across storage systems, reducing manual intervention.
- Added validation and error handling for failed recording operations and unexpected storage states to improve solution reliability.
- Investigated failures across backend services, cloud storage, and metadata workflows to identify root causes and implement fixes.
- Monitored production workflows, validated processing outcomes, and addressed operational failures to maintain reliable application services.

Software Engineer • Mantra Technologies

Feb 2024 – Mar 2026 | Hyderabad, India

- Worked across four production applications, contributing to application development, maintenance, backend services, API integrations, and feature delivery.
- Built backend modules, REST APIs, and business logic using Python, FastAPI, and MongoDB for application-specific business workflows.
- Analyzed application requirements and developed frontend and backend functionality using React.js, Next.js, Angular, JavaScript, and TypeScript.
- Implemented authentication, RBAC, and ACL-based authorization to enforce application access controls and protect resources based on user permissions.
- Integrated third-party services including Twilio and GitHub API and supported application deployments across AWS and Vercel.
- Maintained CI/CD workflows and performed testing, debugging, root-cause analysis, bug fixes, and production support for application issues.

Key Projects:

AI Bull — AI-Powered Trading Platform

React.js, Next.js, FastAPI, Python, MongoDB, RAG, LLM

- Developed an AI-powered trading and investment analysis platform supporting stock and mutual fund analysis, screening, and back-testing.

- Implemented a Retrieval-Augmented Generation (RAG) based chatbot that retrieves relevant financial and application-specific information to generate contextual responses.
- Integrated the RAG chatbot into application workflows, enabling conversational access to relevant financial information.
- Built Python and FastAPI backend APIs and business logic for financial data processing and application-specific workflows.
- Developed back-testing engines and configurable screening and filtering capabilities for stocks and mutual funds.

CRM.io — AI-Driven CRM System

FastAPI, Python, Jinja2, MongoDB, ACL, Twilio, REST APIs

- Developed CRM modules for Contacts, Tasks, communication workflows, and telephony operations using FastAPI and Python.
- Implemented RBAC and ACL authorization to enforce application access requirements based on user permissions.
- Integrated Twilio for telephony and communication functionality and developed server-rendered interfaces using Jinja2.
- Tested APIs and business workflows with Postman, diagnosed issues, and resolved bugs across CRM functionality and production workflows.

GharPe — Real Estate Management Platform

React.js, FastAPI, Python, MongoDB, REST APIs

- Developed the React.js-based administration system for managing real estate projects and controlling website visibility and availability.
- Built project management workflows allowing administrators to create, update, configure, and manage projects across the platform.
- Developed lead management functionality to track and manage customer inquiries generated through the application.
- Built builder management features for maintaining builder information and associating builders with their respective projects.
- Developed and integrated FastAPI/Python REST APIs supporting administrative workflows, project configuration, and application data operations.

PERSONAL PROJECTS

[JS Studio](#) — Online JavaScript Playground

Next.js, GitHub API, Vercel

[AnyScrum](#) — Project Management Platform

Next.js, Neon DB, Clerk, Vercel

[Guider](#) — Interactive Learning Portal

Angular 19, TypeScript, SSR, Vercel

[Contact Management App](#) — Contacts Storage Application

React.js, JavaScript, Netlify

EDUCATION & CERTIFICATIONS

B.Tech — Electrical & Electronics Engineering

2019 – 2023 | GPA: 7.73 / 10

Srinivasa Ramanujan Institute of Technology, Anantapur

- Agile Methodology Virtual Experience Program — Cognizant (Oct 2022)
- Python Programming Online Training — APSSDC (May–Jun 2021)
