SUMMARY

Custom Software Engineer with 2.8 years of experience designing, building, and delivering Python applications, REST APIs, backend services, data models, and automation solutions across cloud contact center, AI-driven, CRM, and web platforms. Proficient in Python, FastAPI, Django, Flask, SQL, MongoDB, PostgreSQL, AWS, CI/CD, and testing. Familiar with AI, ML, LangChain, and LangGraph. Experienced in Agile/Scrum development, requirements analysis, API design, debugging, production troubleshooting, and delivering clean, maintainable software solutions.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript (ES6+), TypeScript, HTML5, CSS3

Backend: FastAPI, Django, Flask, REST APIs, Jinja2, serverless-http

AI & ML: AI, Machine Learning, LangChain, LangGraph

Databases: MongoDB, PostgreSQL, Neon DB, Prisma

Cloud & DevOps: AWS, Amazon S3, Linux, GitHub Actions, CI/CD, DevOps

Engineering: Agile, Scrum, API Design, Requirements Analysis, Code Review, Debugging, Unit Testing, Git

Security & Integrations: JWT, bcrypt, RBAC, ACL, Twilio, GitHub API

Frontend: React.js, Next.js, Tailwind CSS

WORK EXPERIENCE

Software Engineer • CA One Tech Cloud Inc.

Apr 2026 – Present | Bengaluru, India

- Built Python backend automation for Convoso, processing 10,000+ call recordings monthly across recovery, S3 storage, and metadata workflows. Owned the recovery system from design through deployment, reducing manual intervention and improving reliability.
- Resolved production issues, optimized backend workflows, performed testing and debugging, and validated deployments to ensure reliable application delivery.

Key Projects:

CONVOSO — Cloud Contact Center Platform

Python, FastAPI, AWS, Amazon S3

- Developed backend services for lead routing, recording management, data processing, and cloud contact center operations.
- Built recording-recovery and metadata-sync workflows handling 10,000+ recordings/month, improving data consistency, reliability, and system performance.

Software Engineer • Mantra Technologies

Feb 2024 – Mar 2026 | Hyderabad, India

- Designed and delivered Python backend features across four production applications in Agile/Scrum environments, collaborating with teams on requirements, API contracts, and data models.
- Developed clean and maintainable REST APIs with RBAC/ACL, optimized application workflows, performed testing and debugging, and supported production software delivery.
- Managed AWS and Vercel deployments, GitHub Actions CI/CD pipelines, and Linux development workflows while troubleshooting application issues.

Key Projects:

AI Bull — AI-Powered Trading Platform

FastAPI, Jinja2, Python, MongoDB

- Engineered back-testing and portfolio import workflows for validating trading strategies against historical market data.
- Built stock and mutual fund screeners with dynamic filtering and data aggregation across 1,000+ financial instruments.

CRM.io — AI-Driven CRM System

FastAPI, Jinja2, Python, ACL, Twilio, MongoDB

- Built REST APIs for Contacts, Tasks, Documents, and Telephony modules supporting core CRM business workflows.
- Integrated Twilio and custom telephony services for call routing, session management, and webhook processing.
- Implemented granular ACL and role-based permissions for secure API-level data access.

PERSONAL PROJECTS

MyContacts — RESTful Contacts API / Contact Management App

Python, FastAPI, MongoDB, JWT, bcrypt, serverless-http

JS Studio — Online JavaScript Playground

Next.js, GitHub API, Vercel, GitHub Actions, Jest

AnyScrum — Project Management Platform

Next.js, Neon DB, Prisma, Clerk, Vercel

EDUCATION & CERTIFICATIONS

B.Tech — Electrical & Electronics Engineering

2019 – 2023 | GPA: 7.73 / 10

Srinivasa Ramanujan Institute of Technology, Anantapur

- Agile Methodology Virtual Experience Program — Cognizant (Oct 2022)
- Python Programming Online Training — APSSDC (May–Jun 2021)
