SUMMARY

Software Engineer with 2.8 years of experience developing and maintaining Python-based backend applications, REST APIs, automation workflows, and cloud services. Experienced in Python, object-oriented programming, unit testing, Git, CI/CD, Agile development, and production troubleshooting. Strong experience contributing across requirements understanding, development, testing, deployment, and maintenance of production applications.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Backend: FastAPI, REST APIs, OOP, Node.js, Express.js, Jinja2

Testing: PyTest, Unit Testing, Postman, Jest

DevOps & Tools: Git, GitHub Actions, CI/CD, AWS, Linux, Vercel

Databases: MongoDB, Neon DB

Development Practices: Agile, Requirements Gathering, Troubleshooting, Documentation

WORK EXPERIENCE

Software Engineer • CA One Tech Cloud Inc.

Apr 2026 – Present | Bengaluru, India

- Building Python-based backend automation for the Convoso cloud contact center platform, processing 10,000+ call recordings monthly across recovery, cloud storage, and metadata synchronization workflows.
- Designed and built a call-recording recovery and S3 storage management system from the ground up, reducing manual intervention and improving production reliability.
- Troubleshoot and resolve production issues across backend processing and recording workflows, optimize storage operations, validate deployments, and support day-to-day testing and production operations.

Key Projects:

CONVOSO — Cloud Contact Center Platform

Python, FastAPI, AWS, Amazon S3

- Developed Python-based backend services for lead routing, recording management, data processing, and cloud-based contact center operations.
- Built recording-recovery and metadata-synchronization workflows handling 10,000+ recordings/month, improving data consistency and system performance.

Software Engineer • Mantra Technologies

Feb 2024 – Mar 2026 | Hyderabad, India

- Delivered features across four production applications, contributing throughout requirements understanding, design, development, testing, and deployment in Agile teams.
- Developed scalable Python backend modules and secure REST APIs using FastAPI, applying object-oriented programming, RBAC/ACL authorization, and performance optimizations.
- Managed Git-based source control, GitHub Actions CI/CD pipelines, AWS and Vercel deployments, and Linux-based development workflows.

Key Projects:

AI Bull — AI-Powered Trading Platform

React.js, Next.js, FastAPI, Python, MongoDB

- Developed back-testing engines and financial screening tools with dynamic filtering for stocks and mutual funds, improving investment analysis capabilities.

CRM.io — AI-Driven CRM System

FastAPI, Jinja2, Python, ACL, Twilio, MongoDB

- Built core CRM modules including Contacts, Tasks, and Telephony with Twilio integration and role-based access control.
- Developed secure backend APIs and business logic supporting CRM workflows, user permissions, and production application requirements.

PERSONAL PROJECTS

JS Studio — Online JavaScript Playground

Next.js, GitHub API, Vercel

AnyScrum — Project Management Platform

Next.js, Neon DB, Clerk, Vercel

Guider — Interactive Learning Portal

Angular 19, SSR, TypeScript, Vercel

Contact Management App — Contacts Storage

React.js, Netlify

EDUCATION & CERTIFICATIONS

B.Tech — Electrical & Electronics Engineering

2019 – 2023 | GPA: 7.73 / 10

Srinivasa Ramanujan Institute of Technology, Anantapur

- Agile Methodology Virtual Experience Program — Cognizant (Oct 2022)
- Python Programming Online Training — APSSDC (May–Jun 2021)
