SUMMARY

Backend Software Engineer with 2.8 years of experience designing and delivering scalable APIs, backend services, data models, and automation solutions across cloud contact center, AI-driven, CRM, and web platforms. Proficient in Python, FastAPI, Node.js, and REST API design, with hands-on experience in JWT authentication, RBAC/ACL authorization, database management, third-party integrations, AWS services, and production troubleshooting. Experienced in owning backend features end-to-end, optimizing server-side workflows, and building reliable production systems in Agile environments.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript (ES6+), TypeScript, HTML5, CSS3

Backend: FastAPI, Node.js, Express.js, REST APIs, Jinja2, serverless-http

Databases: MongoDB, PostgreSQL, Neon DB, Prisma

Auth & Security: JWT, bcrypt, RBAC, ACL, Clerk

Cloud & Infrastructure: AWS, Amazon S3, Vercel, Linux

Integrations: Twilio, GitHub API

Testing & Tools: Postman, Jest, Unit Testing, Git, GitHub Actions, VS Code

Frontend: React.js, Next.js, Tailwind CSS

WORK EXPERIENCE

Software Engineer • CA One Tech Cloud Inc.

Apr 2026 – Present | Bengaluru, India

- Built backend automation for Convoso, processing 10,000+ call recordings monthly across recovery, S3 storage, and metadata workflows. Designed the recording recovery system from the ground up, reducing manual intervention and improving reliability.
- Resolved production issues across the recording pipeline, optimized storage workflows, and validated deployments. Improved reliability and supported day-to-day testing and production operations.

Key Projects:

CONVOSO — Cloud Contact Center Platform

Python, FastAPI, AWS, Amazon S3

- Developed backend services for lead routing, recording management, data processing, and cloud-based contact center operations.
- Built recording-recovery and metadata-sync workflows handling 10,000+ recordings/month, improving data consistency and system performance.

Software Engineer • Mantra Technologies

Feb 2024 – Mar 2026 | Hyderabad, India

- Designed and delivered backend features across four production applications in Agile/Scrum environments, collaborating with frontend teams on API contracts and data models.
- Developed scalable REST APIs with RBAC/ACL authorization, optimized backend workflows, and validated endpoints using Postman.
- Managed AWS and Vercel deployments, GitHub Actions CI/CD pipelines, and Linux-based development workflows.

Key Projects:

AI Bull — AI-Powered Trading Platform

FastAPI, Jinja2, Python, MongoDB

- Engineered back-testing and portfolio import workflows for validating trading strategies against historical market data.
- Built backend logic for stock and mutual fund screeners with dynamic filtering and data aggregation across 1,000+ financial instruments.

CRM.io — AI-Driven CRM System

FastAPI, Jinja2, Python, ACL, Twilio, MongoDB

- Built backend APIs for Contacts, Tasks, Documents, and Telephony modules, supporting core CRM workflows.
- Integrated custom telephony services and Twilio, handling call routing, session management, and webhook processing.
- Implemented granular ACL and role-based permissions to secure API-level data access across multiple user tiers.

PERSONAL PROJECTS

[MyContacts](#) — RESTful Contacts API / Contact Management App

Next.js, GitHub API, Vercel, JWT, bcrypt, serverless-http

[JS Studio](#) — Online JavaScript Playground

Next.js, GitHub API, Vercel, GitHub Actions, Jest

[AnyScrum](#) — Project Management Platform

Next.js, Neon DB, Prisma, Clerk, Vercel

EDUCATION & CERTIFICATIONS

B.Tech — Electrical & Electronics Engineering

2019 – 2023 | GPA: 7.73 / 10

Srinivasa Ramanujan Institute of Technology, Anantapur

- Agile Methodology Virtual Experience Program — Cognizant (Oct 2022)
- Python Programming Online Training — APSSDC (May–Jun 2021)
