SUMMARY

Full-Stack Software Engineer with 2.8+ years of experience building and maintaining production applications across AI, CRM, trading, and cloud contact center platforms. Strong experience with Python, FastAPI, Django, Flask, JavaScript, React.js, Next.js, REST APIs, MongoDB, AWS, and cloud application development. Experienced in backend and frontend development, API design, business logic, third-party integrations, authentication, RBAC/ACL authorization, cloud automation, and production troubleshooting. Hands-on experience implementing RAG-based chatbot solutions and integrating LLM capabilities for contextual information retrieval. Proven ability to develop scalable backend services, build REST APIs, integrate databases, troubleshoot production issues, test implementations, and support reliable deployments.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Backend & Frameworks: FastAPI, Django, Flask, Node.js, Express.js, REST APIs, API Development, Backend Automation

Frontend: React.js, Next.js, Angular, Tailwind CSS, Bootstrap, Jinja2, Microservices

AI & LLM: RAG, LLM Integration, Vector Search, Prompt Engineering

Databases: MongoDB, PostgreSQL, Neon DB, SQL

Cloud & DevOps: AWS, Amazon S3, Vercel, GitHub Actions, CI/CD, Linux

APIs & Integrations: Twilio, GitHub API, REST APIs, Postman, API Integration

Security & Authentication: Authentication, Authorization, RBAC, ACL, JWT

Testing & Tools: Postman, Jest, Unit Testing, Git, GitHub, Debugging

WORK EXPERIENCE

Software Engineer • CA One Tech Cloud Inc.

Apr 2026 – Present | Bengaluru, India

- Develop backend services and automation for a cloud contact center platform, supporting application workflows, data processing, and cloud-based operations.
- Design and maintain Python and FastAPI services and REST APIs, translating business requirements into reliable backend functionality and third-party integrations.
- Develop AWS-based solutions for application data and storage workflows, with a focus on reliability, validation, error handling, and operational consistency.
- Investigate production issues, perform root-cause analysis, implement bug fixes and feature enhancements, and validate changes before release.

Key Projects:

CONVOSO — Cloud Contact Center Platform

Python, FastAPI, AWS, Amazon S3, REST APIs

- Developed backend services supporting lead routing, call recording management, data processing, and cloud storage workflows.
- Designed recording-recovery workflows processing 10,000+ recordings per month and restoring missing or inconsistent recording data.
- Implemented S3 storage validation and metadata synchronization to maintain consistency between application records and cloud objects.
- Built automation to identify, recover, organize, and synchronize recordings across storage systems, reducing manual intervention.
- Added validation and error handling for failed recording operations and unexpected storage states to improve recovery reliability.
- Traced recording pipeline failures across backend services, cloud storage, and metadata workflows to identify and implement fixes.
- Monitored recording and storage workflows in production, validating processing outcomes and addressing failures to maintain reliable operations.

Software Engineer • Mantra Technologies

Feb 2024 – Mar 2026 | Hyderabad, India

- Worked across four production applications, delivering backend, frontend, API integration, and application features across the stack.
- Built backend modules, REST APIs, and business logic using Python, FastAPI, and MongoDB for application-specific workflows.
- Developed frontend interfaces using React.js, Next.js, Angular, JavaScript, and TypeScript, integrating application workflows with APIs.
- Implemented authentication, RBAC, and ACL-based authorization to enforce access controls across application resources.
- Integrated third-party services including Twilio and GitHub API and supported application deployments across AWS and Vercel.
- Maintained GitHub Actions CI/CD workflows and handled testing, debugging, bug fixes, and production support.

Key Projects:

AI Bull — AI-Powered Trading Platform

React.js, Next.js, FastAPI, Python, MongoDB, RAG, LLM

- Developed an AI-powered trading and investment analysis platform for stock and mutual fund analysis, screening, and back-testing.
- Implemented a Retrieval-Augmented Generation (RAG) based chatbot that retrieves relevant financial and application-specific information to generate contextual responses.
- Integrated the RAG chatbot into application workflows, enabling conversational access to relevant financial information.
- Built FastAPI/Python backend APIs and business logic for financial data processing and application workflows.
- Developed back-testing engines and configurable screening and filtering capabilities for stocks and mutual funds.

CRM.io — AI-Driven CRM System

FastAPI, Python, Jinja2, MongoDB, ACL, Twilio, REST APIs

- Developed CRM modules for Contacts, Tasks, communication workflows, and telephony operations using FastAPI and Python.
- Implemented RBAC and ACL authorization to control access to CRM resources based on user permissions.
- Integrated Twilio for telephony and communication functionality and developed server-rendered interfaces using Jinja2.
- Tested APIs and workflows with Postman and resolved bugs across CRM functionality and production workflows.

PERSONAL PROJECTS

JS Studio — Online JavaScript Playground

Next.js, GitHub API, Vercel

- Developed an online JavaScript playground for writing and executing JavaScript through a web interface.
- Integrated GitHub APIs and deployed the application with Next.js and Vercel.

AnyScrum — Project Management Platform

Next.js, Neon DB, Clerk, Vercel

- Developed a project management platform for projects, tasks, and team workflows.
- Implemented authentication and user management with Clerk and persistent application data with Neon DB.

Guider — Interactive Learning Portal

Angular 19, TypeScript, SSR, Vercel

- Built an interactive learning platform using Angular 19, TypeScript, and server-side rendering with reusable frontend components.
- Deployed the application on Vercel with a production-ready frontend architecture.

Contact Management App — Contacts Storage Application

React.js, JavaScript, Netlify

- Developed a React-based application for creating, viewing, updating, and managing contact information.
- Built reusable UI components and deployed the application on Netlify.

Enterprise REST API Platform — Django and Flask

Python, Django, Flask, Django REST Framework, PostgreSQL, REST APIs, JWT

Backend Application

- Built modular REST APIs using Django, Django REST Framework, and Flask for authentication, business logic, and data-driven workflows.
- Integrated PostgreSQL with CRUD operations, database models, relationships, validation, and API error handling.
- Implemented JWT authentication and role-based access control, with API testing and validation using Postman.

EDUCATION

B.Tech — Electrical & Electronics Engineering

2019 – 2023 | GPA: 7.73 / 10

Srinivasa Ramanujan Institute of Technology, Anantapur
