SUMMARY

Full-Stack Software Engineer with 2.8+ years of experience building, enhancing, and maintaining production-grade applications across AI, CRM, trading, and cloud contact center platforms. Strong experience in Python, FastAPI, JavaScript, React.js, Next.js, REST APIs, MongoDB, AWS, and cloud application development. Experienced in designing backend services and APIs, developing frontend applications, integrating third-party services, implementing authentication and RBAC/ACL authorization, and building production automation for data and cloud-storage workflows. Hands-on experience implementing RAG-based chatbot solutions and integrating LLM capabilities into application workflows for contextual information retrieval. Proven ability to troubleshoot production issues, improve application reliability, perform testing and deployment validation, and contribute across the software development lifecycle.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Angular, Tailwind CSS, Bootstrap, Jinja2

Backend: FastAPI, Node.js, Express.js, REST APIs, API Development, Backend Automation, Authentication, RBAC, ACL

AI & LLM: RAG, LLM Integration, Vector Search, Prompt Engineering

Databases: MongoDB, Neon DB, SQL

Cloud & DevOps: AWS, Amazon S3, Vercel, GitHub Actions, CI/CD, Linux

APIs & Integrations: Twilio, GitHub API, REST APIs, Postman

Testing & Tools: Postman, Jest, Unit Testing, Git, GitHub

WORK EXPERIENCE

Software Engineer • CA One Tech Cloud Inc.

Apr 2026 – Present | Bengaluru, India

- Work as a Software Engineer responsible for backend development, automation, production support, testing, debugging, and deployment validation across the cloud contact center platform.
- Design, develop, and maintain backend services and APIs using Python and FastAPI to support application workflows and business requirements.
- Develop cloud-based solutions using AWS services, manage data and storage workflows, and ensure reliable integration between application services and cloud infrastructure.
- Investigate production issues, perform root-cause analysis, implement bug fixes and feature enhancements, and validate changes across development and production environments.
- Collaborate with development and testing teams to understand requirements, troubleshoot issues, test implementations, and support stable production releases.

Key Projects:

CONVOSO — Cloud Contact Center Platform

Python, FastAPI, AWS, Amazon S3, REST APIs

- Developed Python backend services supporting lead routing, call recording management, data processing, cloud storage, and automated operational workflows.
- Designed recording-recovery workflows processing 10,000+ recordings per month, restoring missing or inconsistent recording data and improving recovery reliability.
- Implemented S3 storage validation and metadata synchronization to maintain consistency between application records and cloud objects.
- Added validation and error handling for failed recording operations and unexpected storage states, improving recovery reliability.
- Built automation to identify, recover, organize, and synchronize recordings across storage systems while reducing manual intervention.
- Investigated recording pipeline failures and storage inconsistencies, tracing issues across backend services, cloud storage, and metadata workflows to implement fixes.

Software Engineer • Mantra Technologies

Feb 2024 – Mar 2026 | Hyderabad, India

- Worked as a Full-Stack Software Engineer across four production applications, contributing to backend development, frontend development, API integration, testing, deployment, debugging, and production support.
- Designed and developed backend services, REST APIs, and application business logic using Python, FastAPI, and MongoDB.
- Developed frontend interfaces and application workflows using React.js, Next.js, Angular, JavaScript, and TypeScript, integrating them with backend APIs and services.
- Implemented authentication, RBAC, and ACL-based authorization to manage access to application resources and enforce user-level permissions.
- Integrated third-party APIs including Twilio and GitHub API to extend application functionality and support business workflows.
- Managed application deployments across AWS and Vercel, maintained GitHub Actions CI/CD workflows, and supported Linux-based development environments.
- Participated in debugging, testing, bug fixing, feature enhancements, and production troubleshooting throughout the software development lifecycle.

Key Projects:

- AI Bull — AI-Powered Trading Platform

React.js, Next.js, FastAPI, Python, MongoDB, RAG, LLM

 - Developed an AI-powered trading and investment analysis platform for stock and mutual fund analysis, screening, and back-testing.
 - Implemented a Retrieval-Augmented Generation (RAG) based chatbot that retrieves relevant financial and application-specific information to generate contextual responses.
 - Integrated the RAG chatbot into the application workflow, enabling conversational access to relevant financial information.
 - Built FastAPI/Python backend APIs and business logic for financial data processing and application workflows.
 - Developed back-testing engines and configurable screening and filtering capabilities for stocks and mutual funds.
 - Built React.js and Next.js interfaces for interactive financial analysis and integrated them with backend APIs.
- CRM.io — AI-Driven CRM System

FastAPI, Python, Jinja2, MongoDB, ACL, Twilio, REST APIs

 - Developed CRM modules for Contacts, Tasks, communication workflows, and telephony operations using FastAPI and Python.
 - Implemented RBAC and ACL authorization to control access to CRM resources based on user permissions.
 - Integrated Twilio for telephony and communication functionality and developed server-rendered interfaces using Jinja2.
 - Tested APIs and workflows with Postman and contributed to debugging, bug fixes, and production support.

PERSONAL PROJECTS

- JS Studio — Online JavaScript Playground

Next.js, GitHub API, Vercel

 - Developed an online JavaScript playground for writing and executing JavaScript through a web interface.
 - Integrated GitHub APIs and deployed the application with Next.js and Vercel.
- AnyScrum — Project Management Platform

Next.js, Neon DB, Clerk, Vercel

 - Developed a project management platform for projects, tasks, and team workflows.
 - Implemented authentication and user management with Clerk and persistent application data with Neon DB.
- Guider — Interactive Learning Portal

Angular 19, TypeScript, SSR, Vercel

 - Built an interactive learning platform using Angular 19, TypeScript, and server-side rendering with reusable frontend components.
 - Deployed the application on Vercel with a production-ready frontend architecture.
- Contact Management App — Contacts Storage Application

React.js, JavaScript, Netlify

 - Developed a React-based application for creating, viewing, updating, and managing contact information.
 - Built reusable UI components and deployed the application on Netlify.

CERTIFICATIONS

- Agile Methodology Virtual Experience Program — Cognizant (Oct 2022)
- Python Programming Online Training — APSSDC (May–Jun 2021)

EDUCATION

B.Tech — Electrical & Electronics Engineering

2019 – 2023 | GPA: 7.73 / 10

Srinivasa Ramanujan Institute of Technology, Anantapur
