SUMMARY

Full-Stack Software Engineer with 2.8+ years of experience building production applications across AI, CRM, trading, and cloud contact center platforms. Strong in Python, FastAPI, JavaScript, React.js, Next.js, REST APIs, MongoDB, and AWS. Experienced in backend and frontend development, AI/LLM integration, RAG, authentication, third-party APIs, automation, testing, deployment, and production support.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Angular, Tailwind CSS, Bootstrap, Jinja2

Backend: FastAPI, Node.js, Express.js, REST APIs, API Development, Backend Automation, Authentication, RBAC, ACL

AI & LLM: RAG, LLM Integration, Vector Search, Prompt Engineering

Databases: MongoDB, Neon DB, SQL

Cloud & DevOps: AWS, Amazon S3, Vercel, GitHub Actions, CI/CD, Linux

APIs & Integrations: Twilio, GitHub API, REST APIs, Postman

Testing & Tools: Postman, Jest, Unit Testing, Git, GitHub

WORK EXPERIENCE

Software Engineer • CA One Tech Cloud Inc.

Apr 2026 – Present | Bengaluru, India

- Developed Python backend services and automation for Convoso, supporting call recordings, cloud storage, metadata sync, and recovery workflows for 10,000+ recordings monthly.
- Built call-recording recovery and S3 storage automation from the ground up, reducing manual work and improving reliability.
- Automated recording detection, recovery, organization, and metadata synchronization across storage systems.
- Used Python and AWS to build cloud workflows for recording, data processing, storage, and production support.
- Troubleshoot production issues across backend, storage, metadata, and deployment workflows.
- Performed testing, bug fixes, feature enhancements, and deployment validation across development and production.
- Collaborated with development and QA teams on requirements, fixes, root-cause analysis, and workflow improvements.

Key Projects:

CONVOSO — Cloud Contact Center Platform

Python, FastAPI, AWS, Amazon S3, REST APIs

- Developed Python backend services for lead routing, call recording, data processing, cloud storage, and automation.
- Built recovery workflows for 10,000+ recordings monthly.
- Implemented Amazon S3 workflows for recording storage and metadata consistency.
- Synchronized recording metadata across application services and cloud storage.
- Automated recording management and recovery tasks, reducing manual effort.
- Added validation and error handling for failed operations and storage states.
- Integrated REST APIs with contact center and data-processing workflows.
- Investigated backend, storage, and data issues to identify root causes.
- Tested and validated recording recovery and storage changes across environments.

Software Engineer • Mantra Technologies

Feb 2024 – Mar 2026 | Hyderabad, India

- Worked across four production applications on design, development, testing, deployment, debugging, and production support.
- Built reusable backend modules with Python, FastAPI, REST APIs, and MongoDB for business workflows.
- Developed secure REST APIs with authentication, RBAC, and ACL-based authorization.
- Developed frontend features with React.js, Next.js, Angular, JavaScript, and TypeScript, integrated with backend APIs.
- Integrated Twilio and GitHub APIs to extend features and automate application workflows.
- Managed AWS/Vercel deployments, GitHub Actions CI/CD, and Linux environments.

Key Projects:

AI Bull — AI-Powered Trading Platform

React.js, Next.js, FastAPI, Python, MongoDB, RAG, LLM

- Developed an AI-powered trading platform for stock/mutual fund analysis, screening, and back-testing.
- Built a Retrieval-Augmented Generation (RAG) chatbot that retrieves relevant financial and application context for user queries.
- Implemented query-based retrieval to provide relevant context for LLM responses.
- Used vector search to retrieve relevant information and ground LLM responses.
- Applied prompt engineering to structure retrieved context for relevant responses.
- Integrated the RAG chatbot with backend APIs for conversational financial queries.

- Built FastAPI/Python services for financial data, business logic, and chatbot workflows.
- Built back-testing functionality for evaluating strategies against historical data.
- Implemented configurable stock and mutual fund screening using financial criteria.
- Developed React.js/Next.js interfaces for financial analysis and AI workflows.

CRM.io — AI-Driven CRM System

FastAPI, Python, Jinja2, MongoDB, ACL, Twilio, REST APIs

- Implemented core CRM functionality for managing contacts, tasks, communication activities, and telephony-related operations.
- Developed FastAPI and Python services containing application logic, REST endpoints, user workflows, and data-management operations.
- Applied role-based access control and ACL authorization to protect CRM resources and enforce permissions according to user roles and access levels.
- Integrated Twilio APIs to provide telephony and communication capabilities within the CRM application and its workflows.
- Created server-rendered interfaces with Jinja2 and connected user-facing workflows with backend services and APIs.
- Validated APIs and end-to-end application workflows using Postman while contributing to debugging, defect resolution, and production support activities.

PERSONAL PROJECTS

[JS Studio](#) — Online JavaScript Playground

Next.js, GitHub API, Vercel

- Built a browser-based JavaScript playground where users can write, execute, test, and experiment with JavaScript through an interactive web interface.
- Connected GitHub APIs to enable project and repository-related functionality and streamline associated workflows.
- Developed and deployed the application with Next.js and Vercel.

[AnyScrum](#) — Project Management Platform

Next.js, Neon DB, Clerk, Vercel

- Created a project management platform for structuring projects, tasks, collaboration activities, and team workflows.
- Implemented authentication and user-management capabilities using Clerk for secure application access.
- Integrated Neon DB for persistent data storage and deployed the application through Vercel.

[Guider](#) — Interactive Learning Portal

Angular 19, TypeScript, SSR, Vercel

- Developed an interactive learning portal with Angular 19 and TypeScript using server-side rendering for the application frontend.
- Created reusable UI components and organized learning workflows to provide a structured and engaging user experience.
- Deployed the platform on Vercel with a production-oriented frontend architecture.

[Contact Management App](#) — Contacts Storage Application

React.js, JavaScript, Netlify

- Developed a React-based contact management application for adding, viewing, editing, and maintaining contact records.
- Implemented reusable interface components and client-side logic to support contact creation and management workflows.
- Published the application through Netlify.

CERTIFICATIONS

- Agile Methodology Virtual Experience Program — Cognizant (Oct 2022)
- Python Programming Online Training — APSSDC (May–Jun 2021)

EDUCATION

B.Tech — Electrical & Electronics Engineering

2019 – 2023 | GPA: 7.73 / 10

Srinivasa Ramanujan Institute of Technology, Anantapur
