

Nikhilesh Vijay Chirutala

Full-Stack Developer | React.js & Python

+91-9618873598 • nikhilesh.chirutala@gmail.com • [Linkedin](#) • [Github](#) • [Portfolio](#) • Bengaluru, IN

SUMMARY

Full-Stack Developer with 2.8+ years of experience building and maintaining production web applications and backend services using React.js, JavaScript, Python, FastAPI, REST APIs, and MongoDB. Experienced in developing responsive frontend interfaces, backend APIs, business workflows, database-driven applications, authentication, JWT-based security, RBAC/ACL authorization, third-party integrations, and cloud deployments. Strong hands-on experience working across the full application stack, integrating frontend workflows with REST APIs, debugging production issues, testing APIs, and supporting reliable deployments. Experienced in building AI-enabled web applications and integrating RAG and LLM capabilities into application workflows.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Angular, JavaScript, TypeScript, Tailwind CSS, Bootstrap, Jinja2

Backend: Python, FastAPI, Django, Flask, REST APIs, API Development, Backend Automation, Business Logic

API Development: REST API Design, REST APIs, API Integration, Postman, Third-Party API Integration

Databases: MongoDB, PostgreSQL, Neon DB, SQL

Authentication & Security: JWT, Authentication, Authorization, RBAC, ACL

AI & LLM: RAG, LLM Integration, Vector Search, Prompt Engineering

Cloud & DevOps: AWS, Amazon S3, Vercel, GitHub Actions, CI/CD, Linux

Development & Testing: Git, GitHub, Postman, Jest, Unit Testing, Debugging

WORK EXPERIENCE

Python Software Engineer • CA One Tech Cloud Inc.

Apr 2026 – Present | Bengaluru, India

Client: Convoso — Cloud Contact Center Platform

Python, FastAPI, AWS, Amazon S3, MySQL, Datadog

- Develop and maintain production-grade Python and FastAPI services for a high-volume cloud contact center platform, supporting call-recording ETL, data processing, storage workflows, and production operations.
- Built and maintained backend service APIs and application workflows using Python and FastAPI, integrating business logic, validation, persistence, retries, and failure handling.
- Migrated a legacy Perl-based call-recording workflow to a long-running Python service deployed across 40 production clusters, supporting feature flags, staged rollout, validation, rollback, and monitoring.
- Built Python integrations with a Call Intelligence microservice, implementing service APIs, eligibility checks, account and campaign controls, daily processing limits, retries, response validation, and result persistence.
- Developed validation and recovery workflows for call-recording data, handling incomplete processing, failed operations, and inconsistent storage states across production environments.
- Supported production deployment and rollout of Python services across multiple clusters, including feature-flag configuration, validation, monitoring, and troubleshooting during migration activities.
- Built AWS S3 audit and recovery workflows for recording storage, including deterministic object handling and idempotent re-upload operations for incomplete or failed storage migrations.
- Implemented production observability using Datadog, StatsD, dashboards, and Sentry for monitoring service health, tracking errors, diagnosing processing failures, and supporting production incident resolution.
- Investigated production issues across Python services, REST APIs, databases, and cloud storage, performing troubleshooting and implementing fixes to maintain reliable application workflows.

Software Engineer • Mantra Technologies

Feb 2024 – Mar 2026 | Hyderabad, India

- Worked across four production web applications, delivering full-stack features across frontend development, backend services, REST APIs, database workflows, API integrations, and application business logic.
- Built backend modules, REST APIs, and business logic using Python, FastAPI, and MongoDB for application-specific workflows.
- Developed React.js, Next.js, and Angular frontend interfaces using JavaScript and TypeScript, integrating frontend application workflows with backend REST APIs.
- Implemented authentication, JWT-based security, RBAC, and ACL-based authorization to enforce secure access controls across application resources.
- Integrated third-party services including Twilio and GitHub API and supported application deployments across AWS and Vercel.
- Maintained GitHub Actions CI/CD workflows and handled API testing, debugging, bug fixes, and production support across frontend and backend application components.

Key Projects:

AI Bull — AI-Powered Trading Platform

React.js, Next.js, FastAPI, Python, MongoDB, RAG, LLM

- Developed a full-stack AI-powered trading and investment analysis platform for stock and mutual fund analysis, screening, and back-testing.
- Developed React.js and Next.js frontend workflows and integrated application interfaces with FastAPI/Python backend APIs.
- Built FastAPI/Python REST APIs and backend business logic for financial data processing and application workflows.
- Implemented a Retrieval-Augmented Generation (RAG) based chatbot that retrieves relevant financial and application-specific information to generate contextual responses.
- Integrated the RAG chatbot into application workflows, enabling conversational access to relevant financial information.
- Developed configurable screening, filtering, and back-testing capabilities for stocks and mutual funds.

CRM.io — AI-Driven CRM System

FastAPI, Python, Jinja2, MongoDB, ACL, Twilio, REST APIs, JWT

- Developed CRM modules for Contacts, Tasks, communication workflows, and telephony operations using FastAPI, Python, and REST APIs.
- Implemented authentication, RBAC, ACL authorization, and JWT-based access control to secure CRM resources based on user permissions.
- Integrated Twilio for telephony and communication functionality and developed application interfaces using Jinja2.
- Tested REST APIs and application workflows with Postman and resolved bugs across CRM functionality and production workflows.

GharPe — Real Estate Management Platform

React.js, FastAPI, Python, MongoDB, REST APIs

- Developed the React.js-based admin system for managing real estate projects and controlling their visibility and availability across the website.
- Built project management workflows allowing administrators to create, update, configure, and manage projects displayed across the platform.
- Developed lead management functionality to track and manage customer inquiries generated through the platform.
- Built builder management features for maintaining builder information and associating builders with their respective projects.
- Developed and integrated FastAPI/Python REST APIs supporting administrative workflows, project configuration, and database operations.

PERSONAL PROJECTS

JS Studio — Online JavaScript Playground

Next.js, JavaScript, GitHub API, Vercel

- Developed an online JavaScript playground for writing and executing JavaScript through a web interface.
- Integrated GitHub APIs and deployed the application with Next.js and Vercel.

AnyScrum — Project Management Platform

Next.js, Neon DB, Clerk, Vercel

- Developed a project management platform for projects, tasks, and team workflows using Next.js.
- Implemented authentication and user management with Clerk and persistent application data with Neon DB.

Guider — Interactive Learning Portal

Angular 19, TypeScript, SSR, Vercel

- Built an interactive learning platform using Angular 19, TypeScript, and server-side rendering with reusable frontend components.
- Deployed the application on Vercel with a production-ready frontend architecture.

Enterprise REST API Platform — Django and Flask Backend Application

Python, Django, Flask, PostgreSQL, REST APIs, JWT

- Built modular REST APIs using Django, Django REST Framework, and Flask for authentication, business logic, and data-driven workflows.
- Integrated PostgreSQL with CRUD operations, database models, relationships, validation, and API error handling.
- Implemented JWT authentication and role-based access control, with API testing and validation using Postman.

EDUCATION

B.Tech — Electrical & Electronics Engineering

2019 – 2023 | GPA: 7.73 / 10

Srinivasa Ramanujan Institute of Technology, Anantapur
