SUMMARY

Full-Stack Software Engineer with 2.8 years of experience building scalable web applications across AI, CRM, and cloud platforms. Experienced in designing backend APIs, developing modern frontend interfaces, and delivering production-ready features using Python, JavaScript, and cloud technologies. Passionate about building reliable products, solving complex engineering challenges, and contributing across the full software development lifecycle.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Angular, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, FastAPI, REST APIs, Jinja2

Databases: MongoDB, Neon DB

Testing: Postman, Jest, Unit Testing

Cloud & Tools: AWS, Git, GitHub Actions, Linux, Vercel, Postman, Twilio

WORK EXPERIENCE

Software Engineer • CA One Tech Cloud Inc.

Apr 2026 – Present | Bengaluru, India

- Building backend automation for the Convoso cloud contact center platform, processing 10,000+ call recordings monthly across recovery, cloud storage, and metadata sync workflows.
- Designed and built a call-recording recovery and S3 storage management system from the ground up — no prior automation existed — reducing manual intervention and improving production reliability.
- Troubleshoot and resolved production issues across the recording pipeline; optimized backend storage workflows and validated deployments to support day-to-day testing and production operations.

Key Projects:

CONVOSO — Cloud Contact Center Platform

Python, FastAPI, AWS, Amazon S3

- Developed backend services for lead routing, recording management, data processing, and cloud-based contact center operations.
- Built recording-recovery and metadata-sync workflows handling 10,000+ recordings/month, improving data consistency and system performance.

Software Engineer • Mantra Technologies

Feb 2024 – Mar 2026 | Hyderabad, India

- Delivered features across four production applications, contributing throughout design, development, testing, and deployment in Agile teams.
- Developed scalable backend modules with secure REST APIs, RBAC/ACL authorization, and performance optimizations, validating APIs using Postman.
- Managed application deployments on AWS and Vercel, maintained GitHub Actions CI/CD pipelines, and supported Linux-based development workflows.

Key Projects:

AI Bull — AI-Powered Trading Platform

React.js, Next.js, FastAPI, Python, MongoDB

- Developed back-testing engines and financial screening tools with dynamic filtering for stocks and mutual funds, improving investment analysis capabilities.

CRM.io — AI-Driven CRM System

FastAPI, Jinja2, Python, ACL, Twilio, MongoDB

- Built core CRM modules including Contacts, Tasks, and Telephony with Twilio integration and role-based access control.
- Developed secure backend APIs and business logic supporting CRM workflows and user permissions.

PERSONAL PROJECTS

JS Studio — Online JavaScript Playground

Next.js, GitHub API, Vercel

AnyScrum — Project Management Platform

Next.js, Neon DB, Clerk, Vercel

Guider — Interactive Learning Portal

Angular 19, SSR, TypeScript, Vercel

Contact Management App — Contacts Storage

React.js, Netlify

EDUCATION & CERTIFICATIONS

B.Tech — Electrical & Electronics Engineering

2019 – 2023 | GPA: 7.73 / 10

Srinivasa Ramanujan Institute of Technology, Anantapur

- Agile Methodology Virtual Experience Program — Cognizant (Oct 2022)
- Python Programming Online Training — APSSDC (May–Jun 2021)
